### **DETAILED ACTION**

Receipt is acknowledged of the Amendment filed 12/14/2009.

The rejection under 35 USC 112, first paragraph is withdrawn in view applicant's amendment.

The following rejections are cited after a review for patentability and additional search:

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 73-76 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for polysaccharides and synthetic polymers, does not reasonably provide enablement for all natural polymers. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims.

The specification sets out that the biocompatible polymers include polysaccharides and synthetic polymers. However, even this is problematic in that the synthetic polymers also include polysaccharides. Therefore, it is suggested that

applicant combine claim 74 with claim 73 and set out that the "natural polysaccharides consist of polysaccharides".

Claims 78, 90 and 100 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The claims are unclear in their reference to "analgesics and analgesic combinations". Applicant appears to already be claiming possible multiple analgesics in using the plural of the term. The specification at page 18, line 8 provides no further clarification. Applicant is requested to delete "analgesic combinations".

The following rejection is made in response to the amendment of the claims:

Claims 72-104 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicants have amended the claims to read on a "bioactive" polymer. There is no support in the specification for this. It is suggested that the term "bioactive" should be deleted.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 72-104 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are indefinite in the use of the term "bioactive" to describe the biocompatible polymer. While applicant is his or her own lexicographer, the term here is used in derogation of art accepted terminology since by applicant's own definition at page 15, lines 24-25, the polymer performs functions common to all non-active carriers.

An art search did not find prior art pertinent to the instantly claimed invention. In fact, the prior art does not teach or suggest the instantly claimed composition or method. In particular, the synthetic apatite which also comprises at least one amino acid is not found in the prior art.

As such, corrections made as cited above would place the application in condition for allowance.
